

SOUMAS HERITAGE SCHOOL OF MUSIC

WHY IS MUSIC TAUGHT?

MUSIC IS A SCIENCE. It is exact and specific. For example, a conductor's musical score is a chart, a graph, which indicates frequencies, intensities, volume changes, melody and harmonies all at once and with the most exact control of time .

MUSIC IS MATHEMATICAL LANGUAGE. It is rhythmically based on the subdivisions of time into fractions, which must be done instantaneously and not worked out on paper.

MUSIC IS A FOREIGN LANGUAGE. Most musical terms are Italian, German, or French. The notation is not English, but a highly developed kind of shorthand that uses symbols to represent ideas. The language of music is a most complete and universal language.

MUSIC HISTORY reflects the environment and times of its creation, often representing cultural norms.
